

Multiple Opening mats

Numbers Method

- 1) No layout is required. Use sketch at right to figure and record borders.
- 2) Figure the distance from the left edge of the mat to the left and right cut of each opening.
- 3) Figure the distance from the bottom edge of the mat to the top and bottom cut of each opening.
- 4) Use the rule pointer for setting the left and bottom borders.
- 5) Add one inch to the top and right border distance and align this result with "1" on the border scale.

Layout Method

- 1) Alignment marks must be added to the pressure foot on the knife head before using this method. See page 16 for this procedure.
- 2) Layout the opening pattern on the back of the matboard.
- 3) Rotate and lower the knife head for the left hand border cut.
- 4) Align the mark on the foot with the pencil line on the mat for the left border and set the left hand stops.
- 5) Rotate the knife head and make the stop settings for the top, right, and bottom borders.

Caution:

Remember you are cutting from the back.
Non-symmetrical patterns must be reversed.
